SUMMARY

A results-driven BTech student in Information Technology at Vishwakarma Institute of Technology, Pune. As a beginner, I have a strong foundation in data structures and problem-solving, with a keen interest in creating logical systems and continuously expanding my knowledge. Always eager to learn, I am currently exploring AI/ML while working on backend development, striving to build efficient and scalable solutions. I am highly adaptive, work efficiently in teams, and can seamlessly blend into different environments. Additionally, I have a deep passion for video games, including testing benchmarks and game development.
