"A highly motivated BTech student in Information Technology at Vishwakarma Institute of Technology, Pune, with a strong foundation in data structures and algorithmic problem-solving. Passionate about building logical systems, I am continuously expanding my expertise, particularly in AI/ML and backend development, to create efficient and scalable solutions. Adaptable and collaborative, I thrive in dynamic environments and excel at integrating seamlessly into diverse teams. Beyond academics, I have a deep passion for video games, including benchmarking and game development, combining my technical skills with creative problem-solving."

PROJECTS

Green Model Advisor : AI Model Selection with Carbon Tracking (Sept 2025 - Nov 2025)

Developed a full-stack platform that intelligently selects AI models based on performance and environmental impact. Integrated three LLM providers (Google Gemini, Mistral, NVIDIA Qwen) with a custom scoring algorithm to balance accuracy and carbon footprint. Built using FastAPI and React, with real-time emissions tracking via CodeCarbon, reducing model selection carbon output by 20% while maintaining >75% code accuracy.

SocialRAG : Full-Stack RAG Chatbot - FastAPI · React · ChromaDB · Groq · Vercel · Render (29 May 2026 - 30 May 2026)

- Built end-to-end RAG pipeline comparing YouTube and Instagram videos with semantic chunking, vector retrieval, and streaming LLM responses over Server-Sent Events
- Designed provider-agnostic LLM layer supporting both local Ollama inference and cloud-based Groq API, with conversational memory and source citation
- Integrated YouTube Data API v3, yt-dlp, and Whisper for resilient multi-source metadata extraction; implemented fallback chains for production reliability
- Deployed full stack at zero cost using Vercel + Render free tiers; documented architecture trade-offs and scaling paths for 1,000+ daily requests

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

AI/ML: RAG, LLMs, Vector Embeddings, Prompt Engineering, Sentence Transformers, EDA, Data Visualization, Feature Engineering, Model Evaluation

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter

Frontend: React.js, Vite, TailwindCSS, Framer Motion

Backend: FastAPI, Pydantic, REST APIs, Server-Sent Events, asyncio

AI Tools: Ollama, Groq API, LangChain, ChromaDB, Hugging Face, Whisper

DevOps: Docker, Vercel, Render, Git, GitHub, CI/CD

Concepts: Full-Stack Development, System Design, Clean Architecture, Microservices, Statistical Analysis, Performance Optimization

WORK EXPERIENCE

AI Developer Intern

Tech Mahindra [Sept 2025] – [Nov 2025]

- Developed Green Model Advisor – a full-stack platform that auto-selects AI models based on carbon efficiency and accuracy
- Engineered FastAPI backend with 3 LLM integrations (Gemini, Mistral, NVIDIA) and built React dashboard for real-time emissions tracking
- Reduced model inference carbon footprint by 20% while maintaining >75% code accuracy through smart routing algorithms

EDUCATION

College	Percentage / GPA	Passout Year
Vishwakarma Institute of Technology	GPA - 9.01	2024 - 2027
Government Polytechnic Nagpur	94.15	2021-2024

Technical Achievements

- Runner-up, SITNovate (2025)
- Published a Research Paper on [A hybrid approach for optimizing performance: enhancing recommendation systems with graph neural networks and two-tower neural networks] in **ISACS2024**.
- Best Paper Award, **ISACS2024 (2024)**
- Published paper “**GestureX: A Real-Time Hand Gesture Recognition System for Intuitive Human-Computer Interaction**” at **IEEE ICCTDC 2025** (Malnad College of Engineering, Hassan).

Creative Endeavors

- Event Head GFG Student Chapter VIT Pune
- Design co-head of GDSC VIT Pune Multimedia Team.
- Creative Executive ,Dept of Information Tech GP Nagpur
